DETAILED ACTION

Drawings

1. Figure 3A, 3B should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Hutchins (US 6428243).

Hutchins discloses a steel pipe rockbolt, comprising a rockbolt main body (20,22,23) and a pressurized-fluid-introducing sleeve (18,20) attached to the rockbolt main body at an end for introduction of a pressurized fluid (26), the pressurized fluid introducing sleeve comprising a projecting part (18) with an outer diameter larger than an aperture

of a bearing plate (19) and a pressurized-fluid-introducing hole, and a bearing-plate-holding part (20) with an outer diameter smaller than the aperture of the bearing plate, whereby the bearing plate locates on an edge of a rockbolt-setting hole drilled in a bedrock or ground, and the bearing-plate-holding part extends through the aperture of the bearing plate into the rockbolt-setting hole.
